The Google Apps Guidebook: Lesson, Activities And Projects Created By Students For Teachers

Synopsis

The Google Apps Guidebook is a set of student created lessons, activities and projects for educators to use in their classrooms. Each lesson connects with a component from the Google Apps for Education suite. The Guidebook takes teachers step by step through the entire process of introducing Google Apps to their students. Each chapter introduces an engaging project that applies numerous aspects of each tool. Projects are differentiated for a variety of age ranges and can be adapted for most content areas. Upon completion, students will have a thorough understanding of the tools included with their Google account and a collection of cool projects they created!

Book Information

Customer Reviews

I am so excited about this book and how it will fit with teaching practice. What an innovative model! It is authored collaboratively by a group of students and their teacher - for students. The lessons are clear, have great visuals, and are easy to understand and follow. The students have a way to keep track of their progress as they work toward certification using a variety of Google tools. Ultimately, the certification qualifies them to be identified as a leader in technology skills in their school while purposefully continuing their learning through teaching. This book is an excellent addition to any district that is implementing Google Apps for Education while putting students in charge of their learning.â ¸

What a great back to school resource. You may have seen the recent photos and articles about Dear Teacher, on social media. This book takes that concept and amplifies it ten fold. All educators

wish to facilitate their students becoming independent and life-long learners, well, Kern and his students have accepted the challenge and are promoting it in this Google Apps book! This book is informative as a read, the pillars to a tech course for students and teachers, and a tribute to how all of us should be supporting our students as they communicate to a larger audience, with purpose!! read the chapters. I used the goo.gl links and even created a brochure for the first day of school using the Tech Sherpa's template!!! Thanks! You will love this book. You need this book on your shelf of resources. Of course, you could buy the e-book and get the same information with hyperlinks! Thanks, Tech Sherpas for writing this, for sharing and for modeling how to sharing information.

This is a great resource for the classroom! It gives an excellent overview of the Google Apps Suite. The lessons are written well and, with the accompanying pictures, are easy to follow. The "side notes" that give teacher tips are especially helpful. I definitely plan to have my students use this to become more proficient with technology. Ultimately, this book gives you the opportunity to really have a student-centered class where they get to learn valuable 21st century learning skills!
