Behavioral Interventions In Schools: Evidence-Based Postive Strategies (School Psychology (APA))

Synopsis

Offers school psychologists, counselors, social workers, school administrators, and teachers with a summary of ecologically sound primary, secondary, and tertiary prevention strategies. This book discusses prevention measures such as positive behavior support and group contingencies that schools can implement system-wide.

Customer Reviews

A resource that is great for both school psychologists and teaching staff. Each chapter gives a succinct summary of what recent research says about the individual topics and offers practical suggestions for those working in the education sector. As a school psychologist, I have found the book a useful resource for my own practice and I have also recommended it to the schools I work in, particularly the section on systematic approaches to prevention and intervention.

required text for a BCBA course. Lots of fluff, wish it was more direct and straight to the point but a good read.

I had to purchase this book for a class. I would rate it very good. Easy to read and understand. Would of liked to see the chapter on trauma be lengthier.

A great reference book for anyone in education. I would highly recommend it to everyone who has students who need behavioral intervention.

The assessment records are a great resource for those who need to use FBA for those children who need interventions. I have heard the author speak and this book is a realistic application to what ABA therapist can use to help assess clients.
