Your Cleft-Affected Child: The Complete Book Of Information, Resources, And Hope

Synopsis

Clefting is one of the most common birth defects and one of the most reparable. Yet parents of clefted newborns often initially respond with fear, shock, and despair. This first guide written specifically for parents explains what a cleft is, why it occurs, and what can be done about it. Topics include surgical procedures, financial assistance, emotional impact, and forming support groups.

Customer Reviews

I am an older sibling of a child with a cleft and I found this book to be helpful in so many ways when re-searching what was going to be done to my baby brother. It used enough technical terms to explain what was going on, but it also explained things as well. I know that my mother would often read the chapter called Aiden; One child's story when she needed to find hope for her own son. I would recommend this book to everyone whether they are researching clefts or they have a family member who has a cleft. This is a wonderful book that was so extremely helpful to both me and my family and well as other mom's I've talked to around the country.

I read this book before my son was born. I very much related to the mom who wrote this book. She shared in the book many of the same feelings I was experiencing. There was also excellent information provided. This book gave me many things to think about before my son's birth. I had a chance to look into different types of special bottles and have them ordered and on hand before he was born. This book really helped me deal and understand the emotions I would experience as well as the medical situations he would go through. I would highly recommend this book to all new

parents of cleft-affected children.

I bought this book when my child was diagnosed with a cleft lip at her 20 week ultrasound. The information is very helpful and accurately describes the emotions I was having at the time of diagnosis. This is a great resource to get for anyone looking for answers in regards to what to expect with a cleft child.
